<u>DEPARTMENT STATEMENT:</u> All employees are responsible for contributing to an inclusive, safe, and secure work environment that values diverse cultures, perspectives, and experiences, and is free from discrimination. You are expected to work cooperatively with team members and others to enable the Department to provide the highest level of service possible. Your efforts to maintain regular attendance and treat others fairly, honestly, and with respect are critical to the success of the Department's mission and vision.

GENERAL STATEMENT: Under the general supervision of the Supervising Engineering Geologist of the Earthquake Engineering Program, the Field Operations Manager uses seismic instrumentation and communication engineering principles to oversee and coordinate the Field Operations Unit in the installation of strong motion instruments at sites throughout the State. This position is responsible for overseeing the maintenance of the instruments in the strong motion network and management of the field operations work in projects associated with contracts through Interagency/Departmental and other Agreements. Duties include, but are not limited to, the following:

A. SPECIFIC ACTIVITIES: ESSENTIAL / MARGINAL FUNCTIONS

ESSENTIAL FUNCTIONS

35% Project Management

Manage, plan, organize and direct the Field Operations Unit of the Strong Motion Instrumentation Program. Oversee staff charged with the preparation of seismic instrumentation, installation and setting of telecommunication equipment in the field. Oversee post installation activities performed by the Field Operations Unit staff. Using knowledge of electronics theory, plan and oversee staff conducting complex electronic circuitry design. Supervise staff in the design, development, modification, construction, and maintenance of various complex seismologic systems. Using the ability to design and make engineering recommendations on various wire communications systems, oversee the ongoing maintenance and installation of seismologic and data communications equipment required for equipment involving the instrumentation of earthquake monitoring systems in ground response stations throughout the State as they relate to seismic safety. Direct staff charged with the maintenance, repair, and modification of the seismic recording network of over 1350 stations with new installations each year in addition to

FORM PO 199 Rev. 11/2019

other field activities. Organize and manage the planning and implementation of Interagency Agreements of contracts for the seismic instrumentation of bridges, hospitals, ground and other stations. Develop and submit installation plans, including project budgets, and consult with state and local agencies to accomplish and periodically review progress of seismic recording installation projects.

25% Reporting

Develop and submit project plans and budgets for contracting agencies. Prepare and evaluate periodic technical papers, reports, and correspondence on the performance of existing seismic instrumentation in the network and on the current progress of field installations. Analyze telecommunication field data for trends and situations requiring attention. Develop alternatives and corrective actions while making effective use of the available resources. Provide updates to program management on projects, with particular emphasis on those that may affect the reliability or scheduling of seismic instrumentation.

20% Staff Management

Manage, monitor, and assign staff to training programs as needed. Oversee the development of performance standards and evaluation of staff performance. Provide regular and timely written performance appraisals to staff. Counsel staff and initiate disciplinary actions as necessary. Recruit, hire, train, develop, and provide leadership to staff. Comply with state and federal laws, rules, regulations, bargaining unit contracts, and policies in all personnel practices, including, but not limited to hiring, employee development and management. Identify appropriate long-range plans and goals to address succession planning and knowledge transfer.

10% Inventory Management

Make recommendations on equipment inventories to Field Operations staff in charge of submitting purchase orders used in the construction and installation of complex seismic instrumentation. Develop recommendations for the procurement of new or modified types of seismic instrumentation as appropriate. Initiate procurement of technical and field supplies and maintain sufficient inventory as dictated by program needs, including, but not limited to accelerographic instruments, computers, test equipment and associate apparatus (materials and equipment).

MARGINAL FUNCTIONS

5% Miscellaneous

Performs other duties in support of program activities as related to classification specifications as required to support the mission, goals and objectives in a timely manner in order to maintain on-going operational needs. Respond to emergencies related to activities and may be called during off-duty hours in order to maintain critical public safety.

5% Administrative

Perform administrative duties including, but not limited to: adhere to Department policies, rules, and procedures; submit administrative requests including leave, overtime, travel, and training in a timely and appropriate manner; accurately report time in the Tempo timekeeping system; and submit timesheets by the due date.

Senior Telecommunications Engineer

Duty Statement Revision: 05/2022

B. **SUPERVISION RECEIVED**

The Senior Telecommunications Engineer reports directly to, and receives the majority of assignments from, the Supervising Engineering Geologist for Earthquake Engineering Program.

C. SUPERVISION EXERCISED

The Senior Telecommunications Engineer directly supervises Senior Precision Electronics Specialists in charge of the Installation groups I and II, the Maintenance group, as well as the Communication and Development group in the Field Operations Unit.

D. <u>ADMINISTRATIVE RESPONSIBILITIES FOR SUPERVISORS AND MANAGERS</u>

The incumbent performs the full range of supervisory and management duties, including, but not limited to: interpret and adhere to policies, rules, laws, regulations, and bargaining unit contracts; provide direction and guidance regarding work assignments and daily work activities to ensure timely completion of assignments; review work and evaluate performance of staff by providing regular feedback and completing timely probationary reports, annual performance appraisals, and individual development plans; monitor employee performance and, if necessary, utilize progressive discipline principles and procedures; complete personnel action documentation and utilize the competitive hiring process to maintain adequate staffing levels and facilitate recruitment process; and approve or deny administrative requests including leave, overtime, travel, and training.

E. PERSONAL CONTACTS

Routinely interacts with other California Geological Survey (CGS) staff and staff of the California Department of Health Care Access and Information (HCAI), Caltrans, CalOES and other state and federal agencies. Interacts with owners, construction managers, and/or tenants of selected buildings or other structures to coordinate work by the Field Operations staff on their property. Contacts and interactions may be via personal interaction, written correspondence, telephone, and/or e-mail.

F. ACTIONS AND CONSEQUENCES

If these functions are not adequately performed, consequences may include, but are not limited to:

- CGS will not meet its legislative mandates to accurately and effectively instrument buildings and other structures throughout the State.
- CGS will not meet its contractual obligations to instrument bridges, ground sites, or hospital buildings, under Interagency Agreements with HCAI, CalOES and Caltrans.
- If inaccurate data is recorded by sensors maintained by Field Operations, the data may imply that the structure is damaged, when it is not, or conversely that it was unaffected by the earthquake.

G. WORKING CONDITIONS/PHYSICAL REQUIREMENTS

- Travel via private or public transportation (i.e., automobile, airplane, etc.) inside California may be required.
- In performing field work, it may be required to climb ladders and/or wear personal protective equipment such as hard hat, construction boots, safety vest and safety eyewear.

Senior Telecommunications Engineer Duty Statement Revision: 05/2022

- Occasional operation of state owned or rental vehicle to drive long hours to field work or meetings
- Work in an office environment sitting at a desk during core office hours using a desktop computer, keyboard, mouse, monitor, and printers under non-natural lighting for prolonged periods of time.
- Use of multi-line telephone console or a cordless telephone.
- Moving/walking about the office and standing or sitting during in person meetings.
- Bend (neck and waist), squat, kneel, and twist (neck and waist).
- Perform repetitive hand motion, simple grasping, fine manipulation, pushing and pulling with right and left hands.
- Reaching (above and below shoulder level).
- Work indoors in an environmentally controlled high-rise building.

H. OTHER INFORMATION

The incumbent in this position must be willing and able to:

- Work in a team environment.
- Reason logically and creatively and utilize a variety of analytical techniques to resolve governmental problems.
- Develop and evaluate alternatives.
- Analyze data and present ideas and information effectively both orally and in writing.
- Consult with and advise administrators or other interested parties on a wide variety of subject-matter areas.
- Ability to work independently as well as in a team environment.
- Ability to organize and prioritize multiple assignments and deadlines.
- Use business and government standard software/computer, office equipment and specified essential computer resources.
- Possess a valid Driver's License.

Telework may be available for this position in accordance with the Department of Conservation's Telework Policy and procedures.

I have read and understand the duties listed above and I can perform these duties with or without			
reasonable accommodation (if you believe reasonable accommodation is necessary, discuss your			
concerns with your supervisor).			
Employee Signature	Employee Printed Name	Date	
I have discussed the duties of this position with and have provided a copy of this duty statement			
to the employee named above.
